An information recording system that relies heavily on human inter-pretation (e. g. , handwriting, dosages). The rapid pace of medical advances, which overwhelms the ability of caregivers to keep up. The key to solving these problems is greater reliance on IT: to present the health care provider with appropriate patient information and knowl-edge resources at the point of clinical decision making; to record clinical concepts and events in standard, legible, and computable ways; and to check for potential errors in the decision-making process. Currently, most U. S. hospitals, outpatient settings, and other sites of care lack the 9 kind of health IT infrastructure that would support these solutions. Nationwide implementation of health information technology is the only...
