It has been, at any rate, treated as such from the start, until it has rather come to be admitted as something impossible of settlement, and to be left in the class of economic questions which are not really to be settled, but rather to be dismissed as unsettled, and to some extent, insolvable. This characterization may or may not be strictly accurate in particular cases, but it perhaps represents pretty fairly the feeling that exists generally, and will at least serve the purpose of the writer as a starting point. Under the conditions above suggested, the question might be treated as the purely theoretical one of how these corporations might properly be assessed, looked at from the economic standpoint; and how, if you please, they should be assessed in order to make the burden upon them, equal and uniform, as the expression is, with the burden upon other forms of property. Again, the question might be discussed by the assumption of some particular method as being capable of application so as to reach fair and just results.
