

Rockefeller and the Internationalization of Mathematics Between the Two World Wars

By Siegmund-Schultze, Reinhard / Hiebert, E.

Book Condition: New. Publisher/Verlag: Springer, Basel | Document and Studies for the Social History of Mathematics in the 20th Century | Philanthropic societies funded by the Rockefeller family were prominent in the social history of the twentieth century, for their involvement in medicine and applied science. This book provides the first detailed study of their relatively brief but nonetheless influential foray into the field of mathematics. | I Introduction: The "Internationalization" of Mathematics and the Interests Therein of Scientists and Philanthropists.- 1. The Notion of Internationalization as Used in this Book and the Unity of the International and National Dimensions of Science and Mathematics.- 2. The Political and Ideological Dimension of "Internationalization" and Tentative Remarks About the More General Notion of "Modernization".- 3. "Patriotic Political Posturing" of German Scientists After World War I and the Exemplary Degree of Internationalization of German Science: An Example for Possible Conflicts Between Scientific and Political Interests.- 4. American Philanthropic Foundations and Their Interest in International Science and Mathematics Between the Two World Wars.- 5. The Intersection Between the Interests of Mathematicians and of the Foundations, and the Main Goals of this Book.- II The Political and Economic Conditions for International Scientific Collaboration After World...
