It is evident, however, that the enjoyment of the opportunities of mature life will not have been increased for those whose school geography was merely a study of words in a book, or of names on a map, rather than of the meaningful facts of the world. Hence the intellectual no less than the practical value of geography will depend largely on the excellence with which it is taught. THE RELATION OF GEOGRAPHY TO THE SCIENCES. By Herbert M. Wilson, United States Geological Survey. We are passing through a period in which methods of business, of education, and of government are rapidly developing. From the centralization of many diverse units under one administration, as in the change from the college...
