The scope of the work now submitted to the reader, proposes to accomplish five leading objects. Firstly. To throw some new light on the past and present history of Diabetes Mellitus. Secondly. To show more clearly than has hitherto been done, the frequent abnormal condition of the liver, in conjunction with a saccharine condition of the urine. Thirdly. To review some of the most recent physiological facts connected with the subject. Fourthly. To review some of the more obscure pathological causes of Diabetes, more particularly those which are closely allied to the centre of the nervous system.
